

COLONIAL FREESTONE

This classic and attractive finish creates a natural sandstone wall like appearance which never dates. Each block is bolstered around the edge giving a random stoned shipped effect.

Freestone blocks can be used with other finishes to create unique architectural effects.

Smooth corners are also available to create an old town effect.

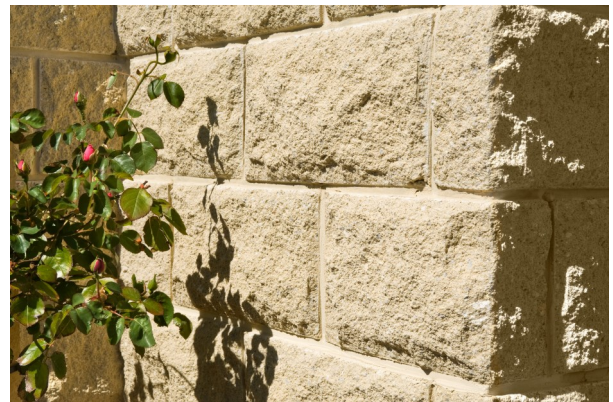

Freestone Sandstone

Colours:

Freestone is available in two standard colours: Sandstone and Limestone.

Other colours may be produced to order — POA

Freestone Limestone

Block Modules Available:

Freestone Full Block

Freestone 3/4 Block (Spilt from Full)

Half Block (Cut and hand bolstered)

45 Deg Squint (Cut and hand bolstered)

Half Height (Cut and hand bolstered)

Tech Dry Mortar Additive 20 Ltr

Tasco coloured blocks incorporate the water repellent additive - "Tech Dry". Tech-Dry protects the masonry units against water absorption thus leading to a dramatic reduction in efflorescence in the finished wall.

Our range of Colonial Freestone is made to order. To ensure colour consistency over large projects, we recommend the entire order of the project be produced together from the same batch. Lead times apply of approximately three to four weeks.

Colour photos in this brochure and sample tiles are provided as an indication of the colours and textures available. Some variations in colour may occur due to natural changes within the raw material source.
