

Tasco's new Capestone Rockface is the ideal block for creating a stylish retaining wall to save on valuable yard space.

The split rock face creates a natural stone like appearance in a large robust block size.

The Capestone Rockface range incorporates a specially formulated water repellent additive from Tech-Dry Building Protection Systems, to protect the masonry units against efflorescence, (lime leaching) and ensure long term colour retention.

Product features

- The block size is 390 long - 180 high at the face.
- Each block steps back 50mm per course.
- 14.25 blocks per m².
- Blocks have a solid top – so no cap is required
- Available in two colours - Bluestone and Limestone.
- Create internal or external curves.
- Walls can go up to 1m high without engineering - however walls can be designed with horizontal geo-fabric reinforcement with a positive connection.

Capestone - Limestone
